Send orders or any questions to us at paphparadise@gmail.com or call us at 209-727-5265

Quantity discounts available, contact us for details.

Species				
Species	Pod	Pollen	Comments	price
<i>Paph hirsutissimum</i>	 Lehua's JEM II' AM/AOS	x self	A fantastic example of this spring blooming species. Huge, distinctive flowers on tall stems. This species forms amazing specimen plants that are very easy to maintain. SALE PRICE...LIMITED!	\$99.00
<i>Paph philippinense</i>	 Paph Paradise'	 Syrah'	This is a sibling cross of two of the best examples of this species that we have ever seen. The 'Paph Paradise' clone is truly amazing, with outstanding form and color. Sorry we didn't get a better photo of this one. 'Syrah' has absolutely incredible color. This cross will produce stunning flowers. We are only releasing a few flasks as we want to grow most of these out ourselves. It simply doesn't get any better than this...not to be missed!	\$175.00
<i>Paph henryanum</i>	 Beaujolais'	 Richard'	Beaujolais' was the first seedling to bloom from a cross we made several years ago. It is vigorous and has fantastic color, with extra spots through the petals. 'Richard' grows like a weed and has enormous flowers with great form. This outcross should have excellent vigor and top notch flower quality. We recently started blooming out another cross made with 'Richard' and the results have been stunning.	\$150.00

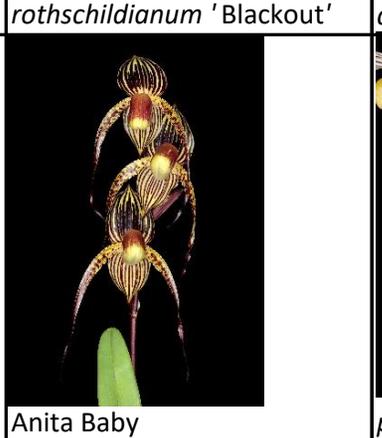

Paph Paradise Fall 2021 Flask List

		<p>This is a very cute species, that can produce a specimen plant in a 3" pot. These should bloom in 18 months from flask in good conditions. We seldom do 'selfings' as we prefer selective line breeding or outcrosses. However, sometimes a plant has unique characteristics that we want to refine. In this case we have a distinctive, colorful individual with more bright green than usual. This should be very interesting!</p>	\$125.00
<i>Paph barbatum v nigratum</i>			

Hybrids

Hybrid	Pod	Pollen	Comments	price
Paph Michael Koopowitz			<p>We have remade this classic hybrid between the two long petaled multifloral species. Our <i>Paph philippinense</i> is one of the finest examples we have seen...potentially an FCC. <i>Paph sanderianum</i> 'Paph Paradise' has fantastic color and had petals close to 70 cm long on its first bloom. These should be exceptionally colorful Michael Koops. We expect many awards to come from this cross.</p>	\$150.00
	<i>philippinense</i> 'Paph Paradise'	<i>sanderianum</i> 'Paph Paradise'		

Paph Paradise Fall 2021 Flask List

			<p>One of the most spectacular multifloral hybrids. The flowers have to be seen in person to fully appreciate the intense colors. This remake is done with a very dark roth, so we could see some very dark flowers here.</p>	<p style="text-align: right;">\$150.00</p>
<p>Paph</p>			<p>Anita Baby is (Hsinying Anita x <i>rothschildianum</i>). The dark color from <i>Paph anitum</i> comes through, and the roth provides good size and form. Crossing to <i>Paph philippinense</i> will increase the flower count and give long petals. 'JEM' is a proven breeder, that imparts vigor and also produces high quality offspring. These are already showing vigor, as the flasks came back from the lab 11 months after the pod went in...very fast for multiflorals.</p>	<p style="text-align: right;">\$150.00</p>
<p>Paph</p>			<p>Jacob's Dream is 62% <i>venustum</i>, with <i>sukhakulii</i> and <i>mastersianum</i> making up the balance. The result was some true yellow color in many of the progeny (sorry about the spray damage in the photo). Crossing this to our largest and fullest green and white should help get some size and form, and hopefully we will capture some bright yellows. An interesting next step in breeding for new colors in Maudiae type Paphs. ***Limited***</p>	<p style="text-align: right;">\$150.00</p>

Paph Paradise Fall 2021 Flask List

<p>Paphiopedilum</p>	 <p>Petula's Sensation 'Tannat'</p>	 <p><i>barbatum v nigratum</i></p>	<p>Paph Petula's Sensation 'Tannat' is our darkest and most impressive clone. Crossed to the diminutive species <i>Paphbarbatum v nigratum</i> we will get plants that will mature and flower in a 2.25" pot. These should flower in less than 18 months if grown well. We expect 100% vinicolors from this cross and perhaps some solid black petals will show up as well.</p>	<p style="text-align: right;">\$150.00</p>
<p>Paphiopedilum</p>	 <p>Delightfully Venus 'Cab Franc'</p>	 <p>Urban Vogue 'Beaujolais'</p>	<p>Two very vigorous hybrids meet here. Delightfully Venus is 50% venustum, which makes it very colorful. Urban Vogue will provide a strong, tall stem and should help maintain excellent color in the petals. Great potential here. ***Very limited***</p>	<p style="text-align: right;">\$125.00</p>
<p>Paph Gloria Naugle</p>	 <p><i>rothschildianum</i> 'Blackout'</p>	 <p><i>micranthum</i> 'Helen' AM/AOS</p>	<p>The best way to get a really good Gloria Naugle is to bloom out a bunch for yourself! An amazingly dark roth crossed to one of the finest <i>micranthum</i>. A can't miss remake of a hybrid that sells out for us as fast as we can produce them. We will only release a few flasks as we want to grow most of these out ourselves.</p>	<p style="text-align: right;">\$150.00</p>
