Species				
Species	Pod	Pollen	Comments	price
<i>Paph rothschildianum</i>	 Paph Paradise' AM/AOS	 Big Papa'	The clonal name of the pod parent tells you how highly we think of this plant. The AM was on its first bloom, it should be upgraded to an FCC at some point. 'Big Papa' was almost 35 cm across on the bloom pictured. This is also a potential FCC plant. We will not release many of these. LIMITED!!!	\$350.00
<i>Paph rothschildianum</i>	 Tempranillo' AM/AOS	 Paph Paradise' AM/AOS	Tempranillo' received an 88 point AM/AOS on its first bloom. It had SEVEN flowers on this spike. Unheard of and never seen before from this species. It may produce 8 on a spike someday. Here we have used our potential FCC 'Paph Paradise' as the pollen parent. It has huge, dark flowers with wide petals and dorsal sepal. Tremendous potential here for exceptional flower quality and high flower count.	\$300.00
<i>Paph henryanum</i>	 Beaujolais'	 Richard'	Beaujolais' was the first seedling to bloom from a cross we made several years ago. It is vigorous and has fantastic color, with extra spots through the petals. 'Richard' grows like a weed and has enormous flowers with great form. This outcross should have excellent vigor and top notch flower quality. We recently started blooming out another cross made with 'Richard' and the results have been stunning.	\$150.00

Paph Paradise Winter 2022 Flask List

		<p>This is a very cute species, that can produce a specimen plant in a 3" pot. These should bloom in 18 months from flask in good conditions. We seldom do 'selfings' as we prefer selective line breeding or outcrosses. However, sometimes a plant has unique characteristics that we want to refine. In this case we have a distinctive, colorful individual with more bright green than usual. This should be very interesting!</p>	\$125.00
<i>Paph barbatum v nigratum</i>			

Hybrids

Hybrid	Pod	Pollen	Comments	price
Paph			<p>Both parents have large spots on the petals that are nicely dispersed so that they really stand out. The Delightfully Venus will bring tremendous vigor and intense color. The Wonderfully Wood parent has huge flowers with very wide petals. There could be some real winners from this cross. Plants should bloom quickly from flask.</p>	\$150.00
<div style="display: flex; justify-content: space-around;">    </div>	<i>rothschildianum</i> 'Blackout'	<i>anitum</i>	s	\$150.00

Paph Paradise Winter 2022 Flask List

<p>Paph</p>	 <p>Anita Baby</p>	 <p><i>philippinense</i> 'JEM' AM'AOS</p>	<p>Anita Baby is (Hsinying Anita x <i>rothschildianum</i>). The dark color from <i>Paph anitum</i> comes through, and the roth provides good size and form. Crossing to <i>Paph philippinense</i> will increase the flower count and give long petals. 'JEM' is a proven breeder, that imparts vigor and also produces high quality offspring. These are already showing vigor, as the flasks came back from the lab 11 months after the pod went in...very fast for multiflorals.</p>	<p style="text-align: right;">\$150.00</p>
<p>Paph</p>	 <p>Macabre Flutter 'Tawny'</p>	 <p><i>sukhakulii</i> 'Cabernet'</p>	<p>Paph Macabre Flutter is HUGE. Crossed to our very best <i>sukhakulii</i> we expect well-formed flowers with tons of spots on the petals. If you like spots this is the one for you.</p>	<p style="text-align: right;">\$125.00</p>
<p>Paph</p>	 <p>Jacob's Dream</p>	 <p>Jacqueline's Sprin Moon 'Viognie'</p>	<p>Jacob's Dream is 62% <i>venustum</i> , with <i>sukhakulii</i> and <i>mastersianum</i> making up the balance. The result was some true yellow color in many of the progeny (sorry about the spray damage in the photo). Crossing this to our largest and fullest green and white should help get some size and form, and hopefully we will capture some bright yellows. An interesting next step in breeding for new colors in Maudiae type Paphs. ***Limited***</p>	

Paph Paradise Winter 2022 Flask List

<p>Paph</p>	 <p>Macabre Illusion 'Alsace'</p>	 <p>Mystically Contrasting 'Petit Sirah'</p>	<p>This cross should produce some amazing things. Some of these should have solid black petals. Others will have deep burgundy veins. There should be some great colors in these...the photos of the parents pretty much tell the whole story here.</p>	<p>\$150.00</p>
<p>Paphiopedilum</p>	 <p>Petula's Sensation 'Tannat'</p>	 <p><i>barbatum v nigratum</i></p>	<p>Paph Petula's Sensation 'Tannat' is our darkest and most impressive clone. Crossed to the diminutive species <i>Paphbarbatum v nigratum</i> we will get plants that will mature and flower in a 2.25" pot. These should flower in less than 18 months if grown well. We expect 100% vinicolors from this cross and perhaps some solid black petals will show up as well. Only one left!</p>	<p>\$150.00</p>
<p>Paphiopedilum</p>	 <p>Delightfully Venus 'Cab Franc'</p>	 <p>Urban Vogue 'Beaujolais'</p>	<p>Two very vigorous hybrids meet here. Delightfully Venus is 50% venustum, which makes it very colorful. Urban Vogue will provide a strong, tall stem and should help maintain excellent color in the petals. Great potential here. ***Very limited***</p>	<p>\$125.00</p>

Paph Paradise Winter 2022 Flask List

<p>Paph Michael Koopowitz</p>	 <p><i>philippinense</i> 'Paph Paradise'</p>	 <p><i>sanderianum</i> 'Paph Paradise'</p>	<p>We have remade this classic hybrid between the two long petaled multifloral species. Our <i>Paph philippinense</i> is one of the finest examples we have seen...potentially an FCC. <i>Paph sanderianum</i> 'Paph Paradise' has fantastic color and had petals close to 70 cm long on its first bloom. These should be exceptionally colorful Michael Koops. We expect many awards to come from this cross.</p>	<p style="text-align: right;">\$150.00</p>
<p>Paph</p>	 <p><i>helenae</i> (Tetraploid)</p>	 <p>Emerald Ring 'Auxerrois' AM/AOS</p>	<p>The next step in teacup Paph breeding. We used a tetraploid <i>helenae</i> to double up on its influence on this hybrid. These will be full formed flowers on compact growing plants. Highly recommended for fans of miniature Paphs.</p>	<p style="text-align: right;">\$175.00</p>
<p>Paph</p>	 <p>Doll's Kobold</p>	 <p>Mem. Sandra Pechter Song HCC/ flask</p>	<p>We made this cross hoping for colorful teacup Paphs. We should see spots in the dorsal sepals and most should have pink pouches. The plants will be very compact and should bloom quickly from flask.</p>	<p style="text-align: right;">\$150.00</p>

Paph Paradise Winter 2022 Flask List

			<p>A similar cross to the one above. We went to our best breeding henryanum instead of the Doll's Kobold. This will provide more spots in the dorsal sepal. Still looking for pink pouches and nice compact growing plants.</p>	<p>\$150.00</p>
<p>Paph</p>	<p><i>henryanum</i> 'Richard'</p>	<p>Mem. Sandra Pechter Song HCC/</p>	<p>The best way to get a really good Gloria Naugle is to bloom out a bunch for yourself! An amazingly dark roth crossed to one of the finest <i>micranthum</i>. A can't miss remake of a hybrid that sells out for us as fast as we can produce them. We will only release a few flasks as we want to grow most of these out ourselves.</p>	<p>\$150.00</p>
<p>Paph Gloria Naugle</p>
