Species				
Species	Pod	Pollen	Comments	price
			<p><i>Paph rothschildianum</i> 'Paradise City' has not been to judging yet, but has the potential to be a strong FCC. The color is outstanding and the form is excellent. 'Paph Paradise' received an 86 point AM/AOS on its first bloom. The petals and sepals are very wide and the color is intense. It is very likely to be upgraded to an FCC on a future bloom. This is a 'can't miss' cross that should produce some of the finest roths ever seen. The reciprocal of the cross we offered is offered below.</p>	\$350.00
<i>Paph rothschildianum</i>	Paph Paradise' AM/AOS	Paradise City'		
			<p>Reciprocal of the cross above. Maybe some darker flowers from this version due to mitochondrial DNA.</p>	\$350.00
<i>Paph rothschildianum</i>	Paradise City'	Paph Paradise' AM/AOS		

Paph Paradise Fall 2022 Flask List

One of our best, darkest roths crossed with our 88 point AM/AOS that had 7 flowers on its first spike when awarded. Tempranillo could be upgraded to an FCC in the future, and Paradise City certainly has FCC potential. Expect at least 6 flowers per spike with the potential for more. Another big step forward in roth breeding. There should be many awards from this cross.

Paph rothschildianum

Paradise City'

Tempranillo' AM/AOS

\$350.00

Our best sukhakulii, which is pretty dark, crossed to an almost solid black petaled select plant from Tokyo Orchids. We may see some nearly solid black petals, and will definitely see very dark pouches. 'Cabernet' has excellent form and good size, which is lacking in the black petal strains. We have high expectations for this cross.

Paph sukhakulii

Cabernet'

Nearly Black'

SOLD OUT

Paph Paradise Fall 2022 Flask List

Paph delenatii dunkel

This is an outcross of two very nice examples of this species. The dunkel form can be slow growing so we selected plants from two distinct breeding lines in order to gain some vigor. Very limited! One flask with about 12-14 seedlings is also available for \$95. The lab ran out of material and made a half flask just this one time.

\$175.00

Paph tigrinum

Gold Country'

TBA'

Gold Country' is a vigorous grower and a very high quality flower. The plant came from a seed pod set at the San Diego Zoo in plants that were seized after an illegal importation. 'TBA' is a select seedling from the Orchid Zone. Bringing these two distinct lines together will provide vigor. Our new replant medium for this species has produced well rooted seedlings...something that is a challenge in the lab.*** Limited availability***No discounts apply***

\$250.00

Paph villosum

Auslese'

Tawny'

A sibling cross of two exceptional first bloom seedlings from our breeding. Very dark dorsal sepals and broad petals on both parents. This next generation should be even better!

\$150.00

Hybrids

Hybrid	Pod	Pollen	Comments	price
<p>Paph</p>	 <p>Leonard's Pride 'Petrus' FCC/AOS, SM/CSA</p>	 <p>lowii 'Alentejo'</p>	<p>Our Leonard's Pride is simply stunning. Lately it has been in bloom for 8-9 months out of the year. It received an 87 point SM/CSA...I rarely see CSA scores much higher than 81. One judge told me that if all 5 flowers had been fully open it would have scored a gold medal over 90 points. We have tried many times to get this plant to breed and FINALLY we have good germination with one of our very best lowii. Looking for an improved Juliis type flower here. Highly recommended!!!</p>	<p>\$350.00</p>
<p>Paph Tainan Lebeau</p>	 <p>Transdoll 'Cabernet' SM/CSA</p>	 <p>roth 'Paph Paradise' AM/AOS</p>	<p>Our awarded Transdoll has amazing color. Crossed to our large, dark rothschildianum 'Paph Paradise' AM/AOS we should see some excellent results. Expect 4 or 5 large, colorful flowers per spike. This is a very similar cross to Paph Lebeau (Transvaal x roth). With improved parents this should rival some of the best Paph Lebeau.</p>	<p>\$150.00</p>

Paph Paradise Fall 2022 Flask List

			<p>Paph Hung Sheng Eagle is (<i>rothschildianum</i> x <i>gigantifolium</i>). It has large flowers with bold stripes and bright red pouches. Paph philippinense 'JEM' AM/AOS has been a proven breeder for us, always giving high quality offspring with great vigor. This cross should produce some excellent results.</p>	<p>SOLD OUT</p>
<p>Paph</p>			<p>This should be an improved version of our Paphiopedilum Paradise in Burgundy cross. The plants will have attractive foliage with flowers ranging from deep pink through burgundy on strong stems. We expect many awards from this cross.</p>	<p>SOLD OUT</p>
<p>Paph</p>			<p>Jacob's Dream is 62% <i>venustum</i> , with <i>sukhakulii</i> and <i>mastersianum</i> making up the balance. The result was some true yellow color in many of the progeny (sorry about the spray damage in the photo). Crossing this to our largest and fullest green and white should help get some size and form, and hopefully we will capture some bright yellows. An interesting next step in breeding for new colors in Maudiae type Paphs.</p>	<p>SOLD OUT</p>

Paph Paradise Fall 2022 Flask List

			<p>Paphiopedilum Transdoll is a wonderful hybrid. Since we have some of the finest roths and liemianum in the world, this cross was a no brainer. Using one of our darkest roths makes us pretty confident that the color from this cross will be exceptional. There will be many awards from this cross.</p>	<p>\$175.00</p>
<p>Paph Transdoll</p>	<p><i>liemianum</i></p>	<p>roth 'Paradise City'</p>	<p>Magic Paradise can stay in bloom for a year or more on each spike. Paph moquetteanum can do the same. We expect colorful, long blooming sequential hybrids with large flowers due to the moquetteanum influence. These will be outstanding!</p>	<p>\$150.00</p>
<p>Paph</p>			<p>Paphiopedilum Ford Hutchcraft is 75% primulinum and 25% complex (Golden Acres). This selfing will produce a population that mostly look like our two awarded clones, but a few should pull in the complex genetics. Certainly some interesting potential here.</p>	<p>\$150.00</p>
<p>Paph Ford Hutchcraft</p>				

Paph Paradise Fall 2022 Flask List

		<p><i>Paphiopedilum delenatii</i> suppresses all color in its offspring except for red. <i>Paphiopedilum hangianum</i> provides size and substance. The result is a flower with a white background and pink overlaid. The flowers are large...up to 15 cm across. A very impressive flower indeed!</p>	
<p>Paph In-Charm Handel</p>	<p><i>delenatii album</i></p>	<p><i>hangianum</i></p>	<p>SOLD OUT</p>
		<p>Two dark multiflorals brought together here. This remake of Anita Baby should produce huge flowers with amazing dark color. This one can't miss!</p>	
<p>Paph Anita Baby</p>	<p><i>roth'</i> Paph Paradise' AM/AOS</p>	<p>Hsinying Anita 'Slipper Zone Tall and Dark' AM/AOS</p>	<p>SOLD OUT</p>
		<p>Not the best photos of either parent, but they are both HUGE. Looking for large flowers with spotted petals with a green background. Other colors will come out of the cross given the background of both parents. The photo of Double Wonder is the plant's first bloom when it was in a 2" pot. A real over-achiever!</p>	
<p>Paph</p>	<p>Luna Spots 'Calistoga'</p>	<p>Double Wonder 'Premier Cru'</p>	<p>\$150.00</p>

Paph Paradise Fall 2022 Flask List

<p>Paph</p>			<p>Two of our very best green Maudiae Paphs. Jacqueline's Spring Moon is very large with great form. The Oriental Aura was awarded as a first blooms seedling and has gotten even more impressive as it matured. Some excellent greens expected here.</p>	<p>SOLD OUT</p>
<p>Paph</p>			<p>Wow! This is a similar cross to Golden Africa (Transvaal x Wellesleyanum). This cross should have better color as our Transdoll is stunning, and the Wellesleyanum we used is exceptional. A very unique combination of a multifloral/sequential with a Brachy. There will be some amazing results here.</p>	<p>\$195.00</p>
<p>Paph</p>			<p>Paph Macbre Illusion 'Porto' is has the darkest black petals of anything in our collection. The Magically Fred parent is huge, with broad petals. Since the Macabre Illusion has red foliage, all of the offspring from this cross should be vinicolor (dark flowers). However, this is our first cross of a black petal flower to a coloratum type so we just don't know for sure. There are some red tones on some of the leaves in flask but it is too soon to be sure how many will have red leaves.</p>	<p>SOLD OUT</p>
