

## Paph Paradise September 2024 Flask List

Some items are limited and orders will be filled on a first come, first served basis.  
 Send orders or any questions to us at [paphparadise@gmail.com](mailto:paphparadise@gmail.com) or call us at 209-727-5265  
 Quantity discounts available, contact us for details.

### Species

Species	Pod	Pollen	Comments	price
<i>Paph primulinum</i>			This is the true species from a selfing of an old collected plant that originated from Ratcliffe Orchids. Most of the plants sold as <i>Paphiopedilum primulinum</i> are actually hybrids. These imposters have spread all over the world, so unless you know the provenance of a plant you probably have a hybrid.	<b>\$150.00</b>
<i>Paph henryanum</i>			This is the third generation of our select breeding line. We have some of the best henryanum in the world and these should be no exception. 'Little Leopard' has fantastic spotting and grows like a weed. Its sibling 'El Dorado' has huge flowers. This should be an outstanding cross and we are only releasing a couple flasks.	<b>\$250.00</b>

## Paph Paradise September 2024 Flask List

<b>Hybrids</b>				
Hybrid	Pod	Pollen	Comments	price
				
<b>Paph Vogue Paradise</b>	Nick Burnett' AM/AOS	Cabernet Franc'	<p>Paph Vogue Paradise is one of the best Maudiae hybrids we have ever made. Two of our finest siblings are crossed here. 'Nick Burnett' is a large, well formed flower. 'Cabernet Franc' has a wider, darker pouch and a more intense green background on the petals. We should get some fantastic flowers from this cross.</p>	<b>\$150.00</b>
				
<b>Paph Mystically Contrasting</b>	Montrachet'	Double Black'	<p>Paph Mystically Contrasting has intense black pigment overlaid on the petals. We selected two distinctly different siblings for this cross, hoping to maintain the deep black pigment and unique coloration of this hybrid. There may be some solid black petals from this cross but we are hoping for more flowers with interesting patterns on the petals instead.</p>	<b>\$150.00</b>

## Paph Paradise September 2024 Flask List

<p>Paph</p>	 <p><i>charlesworthii</i></p>	 <p>Macabre Illusion 'Tannat'</p>	<p>Paph charlesworthii hybrids are always a big hit, especially when they are made with vinicolor Maudes. We are not sure if the black petals of the Macabre Illusion will be passed along in this cross, but it was a homozygous vinicolor. That means that all of the offspring should have dark flowers rather than pink. We say 'should' as some other hybrids made with these black petal Maudes have not behaved 'according to the book', so to speak.</p>	<p style="text-align: right;"><b>\$150.00</b></p>
<p>Paph</p>	 <p><i>urbanianum</i> 'Cabernet'</p>	 <p>Dot's Spots 'Chianti'</p>	<p>This will be a similar cross to our Paph Urban Vogue (urbanianum x Vogue Wonder). That cross has exceptional vigor and blooms like crazy. We even managed to get a couple of them awarded. The hope with this cross is to have more pink pigment over a green background. Most of the flowers will have spotted petals but the intensity will vary from flower to flower.</p>	<p style="text-align: right;"><b>\$150.00</b></p>
<p>Paph</p>	 <p>Petula's Sensation 'Burgundy'</p>	 <p>Santa Ana Sunset 'Gigondas'</p>	<p>Santa Ana Sunset is a cross made by Harold Koopowitz with the goal of producing true red colors. We have put our 'reddest' one on a Petula's Sensation that has a true red background with a near black overlay. This cross should yield red petals with varying amounts of black spots or blotches. It should be a fun cross to bloom out to see what we get.</p>	<p style="text-align: right;"><b>\$150.00</b></p>

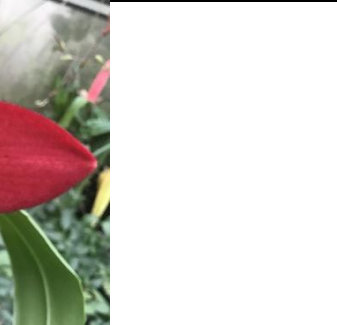

## Paph Paradise September 2024 Flask List

<p><b>Paph Cloud's Prime Crystal</b></p>			<p>Despite being registered 18 years ago, I can't find any photos of this hybrid. Paph moquetteanum isn't used as a parent as often as other sequential species. However, this should be a wonderful hybrid. We expect bright green flowers with pink pouches that should keep blooming for months on end. The moquetteanum influence will result in good size flowers and primulinum should keep the plant size managable.</p>	<p style="text-align: right;"><b>\$150.00</b></p>
<p><b>Paph</b></p>			<p>Both parents are comapct growers, so these should be 'teacup' Maudes. The pod parent is incredibly dark and the pollen parent is very red. Both have very well shaped flowers. We expect a mixture of vinicolors and reds from this cross. It should be very interesting.</p>	<p style="text-align: right;"><b>\$150.00</b></p>
<p><b>Paph</b></p>			<p>Paph Magic Paradise has a large percentage of Paph liemianum. This hybrid should resemble Paph Salvadore Dali, but with a shot of Paph glaucophyllum mixed in. We expect large, sequential blooming flowers on stems that will stay in bloom for many, many months at a time.</p>	<p style="text-align: right;"><b>\$150.00</b></p>

## Paph Paradise September 2024 Flask List

			<p>We love sequential hybrids! They stay in bloom for months and months. The pod parent carried flowers on the same spike for two years. This cross will resemble Paph Sandy's Prime Lime, but with a shot of Paph glaucophyllum thrown into the mix. Fast growing and easy to bloom.</p>	<b>\$150.00</b>
<b>Paph</b>	Magic Paradise 'Merlot' AM/AOS	<i>primulinum v purpurescens</i>	<p>We don't make many Brachy hybrids, but sometimes they catch our eye. Paph Payakka Kodkod is (thaiantum x concolor). Jyn Erso is (Death Star x ballatulum). The pod parent is totally flat and has a nice stem. Crossed with the colorful bellatulum hybrid we are hoping to keep a bit of a stem and get more colorful flowers. The nice thing about Brachys is that you can bloom them in less than 2 years from flask.</p>	<b>\$150.00</b>
			<p>Spotted teacups. That's what we have here. Little Davey has fine spots on the dorsal and petals, the henryanum is heavily spotted. We should get good sized spots on the dorsal and petals and pink pouches. These will be very cute, colorful flowers.</p>	<b>\$150.00</b>
<b>Paph</b>	Payakka Kodkod	Jyn Erso		
				
	Little Davey 'Alsace'	<i>henryanum</i> 'Tiny Leopard'		

## Paph Paradise September 2024 Flask List

			<p>We had the lab make more of these since we love the potential in this cross. A few bloomed last fall on really small plants. We aren't sure what other colors might come through in this teacup, but it will be fun finding out! The color on the first few was amazing.</p>	<p><b>\$150.00</b></p>
<p><b>Paph Helen's Cutie</b></p>	<p>Little Davey 'Premier Cru'</p>	<p>Wossner Helene 'Sangiovese' AM/AOS</p>		
			<p>One of our favorite and absolute best selling hybrids. This cross should have darker stripes than the Angela in the photo, as the fairrieanum was used as the pod parent rather than the poellen parent. Our best niveum provided the pollen so we expect colorful, full flowers. These grow really quickly from flask.</p>	<p><b>\$150.00</b></p>
<p><b>Paph Angela</b></p>	<p>fairrieanum 'Alicante'</p>	<p>niveum 'Montrachet'</p>		
			<p>Our Mem. Dick Clemens was an Orchid Zone stud plant that we got when OZ shut down. The besseae was also from OZ breeding. I don't think I ever took a photo of the Mem. Dick Clemens and the besseae we used, but these should be exceptional examples of this highly awarded and sought after hybrid. The plants look amazing in the flasks. Net price.</p>	<p><b>\$250.00</b></p>
<p><b>Phrag Jason Fischer</b></p>	<p>Mem. Dick Clemens</p>	<p>besseae</p>
